Notice

Our Computer Lab is equipped with Microsoft Excel 2016 & 2010. Due to compatibility issue, Excel 2013 will not be provided.

You may opt to bring along your laptop if you wish to use Excel 2013.

Programme Objective

In any organization the budget is a central aspect of the planning and control systems utilized by the organization. Regardless of the organization's size or complexity, or the product, the market or the service provided by the enterprise, a budget will always feature as a key aspect of financial planning. This programme is dedicated to solving the problems managers face when preparing budgets and forecasts. It combines accounting, budgeting, and forecasting issues with Excel to provide accountants with practical guidance on how to prepare more accurate budgets and forecasts with less time and effort. By combining both traditional budgeting and forecasting concepts with the power and flexibility of Excel, participants are given the tools and techniques needed to meet the ever increasing demands of management, banks, regulators, and investors.

Add Participants

To add **member** participant(s), input the participant's **Membership Number*** and click onto "Search Participant" button. To add more participant(s), repeat the same steps.

To add **non-member** participant(s), input the participant's **Email Address**** and click onto "Search Participant" button. To add more participant(s), repeat the same steps. If no record(s) are found, please click onto "Add New Participant" button to create a new user profile.

*Membership Number is a unique identifier issued to all members of ISCA at the point of membership admission. If you do not have the membership ID, you may check with your member participant before you proceed with course enrollment.

**Please note that email addresses should only be used to search for non-members. Searching for members via their corporate email addresses may not result in an accurate search due to varied email preferences established by ISCA members (eg. use of personal emails) when setting up their user accounts.
